PROBLEM & SOLUTION

The Dangers of Modern Time and Especially Modern Technology

Stress and lack of energy are common consequences of today's living conditions. Our current lifestyle lacks exercise, proper nutrition, sleep, and stress management. New technologies such as cell phones, WiFi, radio-satellite systems, electric cars and more create a massive increase in radiation exposure. Stresses such as financial worries, workplace issues, or a strained home life can lead to sleep disorders and burnout. Climate change and environmental pollution have multiple consequences including effects on our well being.

Did you know that the earth's magnetic field is steadily decreasing (magnetic field deficiency syndrome)? These invisible threats deprive the body of energy it needs for life-sustaining processes.

Mankind is facing very big challenges and **CENTROPIX+** offers new and unique solutions to protect against the effects of these daily challenges. Advanced patented solutions are now available to restore quality of life and give the body back the life energy it needs to life fully.

What Is Life Energy?

A feeling of well-being can only be achieved when your self-preservation processes are supplied with sufficient life energy.

Stress, poor nutrition, lack of exercise, as well as other physical and chemical environmental influences can overwhelm the mechanisms of self-preservation. The usual consequences include poor sleep, feelings of weakness, lack of energy, burnout, and discomfort.

For exactly this reason, the body needs called activation energies that can start the molecular processes in the body and support self-preservation.

The **KLOUD+** technology can support these processes in the body using pulsating electromagnetic fields via PEMA technology and other complementary **CENTROPIX+** products.

One of the special features of the **KLOUD+** device are the various folding options. This not only amplifies the patented signal, but also offers countless and very convenient application possibilities. The average maximum intensity (microtesla) of both applicators is approximately 100 μ T. This varies within the programs and can of course also be adjusted to individual needs. As you fold the device the average intensity increases. Thus, the strength of the signal can be almost doubled for effect.

The magic of natural pulsating magnetic fields and frequencies

Electromagnetic fields and frequencies have been used successfully for decades in various applications such as wellness, therapy and fitness to promote well-being.

The B^2 is a fashion accessory and at the same time a masterpiece of our engineers in the field of wellness and fitness. By integrating natural magnetic field conditions and earth resonance frequencies, better known as Schumann frequencies, the B^2 becomes a stylish companion that can have positive effects on your well-being.

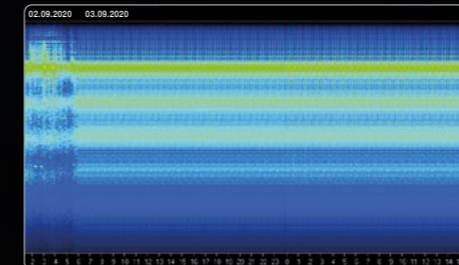

The aim of the development was to find a technical way to compensate for the prevailing problems of Schumann anomalies and the loss of the earth's magnetic field intensity using natural frequencies and electromagnetic field movements.

Balance despite earth anomalies

In the last few centuries, the intensity of our Earth's magnetic field has decreased by more than 50%.

Since 2014, measuring stations have recorded significant anomalies in Schumann resonance field conditions, which previously seemed stable. Possible explanations range from shifts in the magnetic poles, climate change, global warming and increased volcanic activity to changes in the Earth's axis and discharges in the Earth's atmosphere. The Schumann frequencies, in particular the well-known fundamental frequency of 7.83 Hz, are decisive for health and well-being. It is believed that the stability of the Earth's electromagnetic environment is linked to the normal functioning of the human brain and body.

Evaluation of the TOMSK measuring station

The **BUBBLE²** can help ...

- balance out fluctuations in the Schumann earth resonance & field conditions
- reestablish a connection to the elemental force of the earth (grounding)
- increase life energy
- promote focus & concentration
- increase general well-being
- improve mental clarity

The basic functions of the B^2

The Schumann frequency, also known as the earth's frequency, is more than just a physical vibration. It is fundamental to the balance of body and mind.

The **BUBBLE²** acts as a personal "grounder", simulating the course of the Schumann field conditions & frequencies.

In this way, the earth's fundamental frequency is not only transported, but actively integrated into everyday life in order to develop the full potential of your life energy.

BUBBLE²

Third Eye Chakra

Solar Plexus Chakra

Sferics (atmospheric impulse)

The transmission of all frequencies takes place with a Sferics-like progression.

“Sferics” refers to the pulsed occurrence of electromagnetic waves of natural origin in the earth’s atmosphere.

The BUBBLE² uses this Sferics-like technology to optimize the transmission of frequencies and provide you with an effective solution for your health and well-being.

Wearing the B² properly

The BUBBLE² is preferably worn on the chest just below the sternum, near the area of the solar plexus.

According to chakra teachings, this particular positioning facilitates pure life energy and creates a direct connection between the solar plexus chakra (gut feeling/healthy digestion) and the third eye chakra (subconscious/consciousness/well-being center) and feeds the morphogenetic energy field.

This special positioning enables the BUBBLE² to focus its innovative functions on these energy centers.

CENTROPIX APP - the key to personalize your B²

The CENTROPIX APP opens up a world of customization options to suit your individual lifestyle, giving you full control over the functionality of your B².

Standard frequencies (Schumann)

Discover the power of Schumann frequencies with the BUBBLE² and experience the effect of four unique natural frequencies, which are included in the purchase price.

The B² is charged with the Schumann frequency of 7.83 Hz and intensity level 1 (approx. 40 µT) as standard and can also be operated without an app.

Treat yourself to the ultimate experience for body and mind!

The “autopilot”

Experience ultimate comfort for your health in the auto-pilot mode of the BUBBLE². In addition to four powerful Schumann frequencies and three intensity levels, the basic package also offers fully automatic adjustment.

All of these functions are in just one small wearable pendant that you can enjoy wherever you go.

TESTIMONIALS

What Customers Say...

In May of this year, I decided to revive my soccer skills, so I visited the team training session at my local sports club. While I was sprinting, however, I had a sense of unease, so my 2nd soccer career abruptly ended. Running or even walking unassisted was out of the question at first. Only through the immediate use of the **KLOUD** I could manage to walk normally. I then used it several times a day with different programs and there was a noticeable improvement. After just a week, I felt better again and was able to compete in a golf tournament the following weekend. I'm fortunate to have had the **CENTROPIX KLOUD**, and I still use it every day for pain prevention.

Gerhard M.

I'm impressed with the effects of the **KLOUD** magnetic field therapy! My endurance and core stability have improved significantly even though I was very skeptical at the beginning. I recommend this device to everyone.

Nikolai F.

A friend of mine had a sens of unease in her knees for a long time. After three years of various therapies she had problems with her knee again - however, no findings were visible in the MRI. Another product remained without effect, but the **KLOUD** changed everything: after only one treatment with the **KLOUD** (P5, intensity 5) she felt no more discomfort for three days!

E. F.

I would not want to live without the **COCOON** from **CENTROPIX**. I noticed relatively quickly (within 1-2 days) that a lot has changed: You feel protected, like in a bubble of well-being, and you have much more energy. After 7 hours of sleep, I feel well-rested and ready to get up (before we had the **COCOON** that was different). I can think properly again, and my head is clear. In general, my feeling about food has changed: I don't have to stuff food down anymore, I eat much more consciously, and I enjoy eating meals more often. After about 1 week with the **COCOON** I thought I'd lend my device to a friend for a few days so she could test it, too. After just one day, I missed my **COCOON** so much, I was craving the sense of energy and motivation it gave me... I have it back now and will definitely never give it away again.

Renate B.

Six months ago, unfortunately, three 5G antennas were placed within 100 meters of my house. Since then, I feel discomfort more often, the quality of sleep is not very good and especially I fall asleep much worse. 3 days ago, I received the **COCOON** from **CENTROPIX** as a gift from my son-in-law and immediately installed it in my bedroom. I felt much better after 3 days and fell asleep much faster. I would not have thought it possible.

M. G.

Since the **COCOON** is installed in our home, I have a better sleep and am more relaxed. Even the workaholics in our house can suddenly relax and read a book. If one forgets to change the cards, it becomes noticeable in a daytime sleepiness („sleep well“ Card during the day) or restlessness („concentration“ Card during the night), even for those who don't know if and which card is inserted.

SCIENCE

Study with Water Crystals

The water laboratory Hado Life of Dipl. Ing. MSc Rasmus Gaupp-Berghausen has been investigating water for its formative properties for many years.

Water ice crystal photography is the method developed by Dr. Emoto to examine frozen water samples at 200x magnification in a reflected light microscope.

Based on the findings of Dr. Emoto, the form-giving image forces of water are examined and illustrated by ice crystal images. Good and above all natural water is characterized by particularly beautiful and harmonious appearing forms.

Each sample of reverse osmosis water was exposed to a WiFi router for ten minutes before each experiment.

A water sample was placed on the **KLOUD+** for 15 minutes at program 5 and highest intensity.

And the last sample was placed between the WiFi router and the **COCOON+** with its three standard cards (e-smog, sleep well, hawaii harmony) for 10 minutes.

The results are truly fascinating!
